SUMMARY

As an experienced web developer with a wide range of skills in various front-end and back-end web development technologies, such as **MERN**, **MEVN** and **LAMP** Stack and others.

I specialize in creating perfect, rich, and efficient solutions while providing seamless experiences for end-users with high-performance and excellent user experience.

And have been led development of **\$500K** research project which was deemed a "gold standard" by the client.

And also Increased client's **revenue 2-fold** after fine-tuning AI/ML-based algorithms.

EDUCATION

BSc In Electronic and Computer Engineering

Silesian University of Technology

2009 - 2011 Akademicka 2A, 44-100 Gliwice, Poland

GPA

3.9 / 4.0

BA in Financial Management

Wroclaw University of Economics

2012 - 2015

Komandorska 118/120, 53-345 Wroclaw, Poland

GPA

3.8 / 4.0

EXPERIENCE

Senior Full stack Developer

11/2022 - Ongoing

Freelancer Remote

- Shopify backend development. SDK development project bug with JavaScript Next.js fixed.
- Worked on development of Google Chrome extension using React.js and Webpack, which provides convenient swapping between Binance and Ethereum.
- Participated in code reviews on the MERN stack social site and the Vue + Laravel full stack project.

Full Stack Blockchain Developer

03/2021 - 06/2022

Concetai Remote

- Mentored 3 junior developers. Code revision and review of web and mobile projects.
- Engaged in backend architecture design and database design using PHP, Laravel, Node.js, Express.js, Prisma ORM, GraphQL, dbdiagram.io, MySQL, and MongoDB.
- Created interaction between front-end and smart contract using web3.js and Ether.js.

Lead Developer

02/2019 - 12/2020

Syntax Remote

- Led a front-end team to build elegant websites with 5 senior developers using the latest React, Vue, Angular development tools.
- community. Increased the UI development speed by 30%.
- Developed and Deployed smart contract using Solidity to EVM environment using Truffle and Hardhat tools.
- Built shopping, e-commerce projects using PHP, Laravel, CodeIgniter, Shopify, Wordpress CMS.

EXPERIENCE

Full Stack Developer

📅 10/2016 - 01/2019

Generic Remote

- Back-end development with Node.js, Express.js, Nest.js, PHP, Laravel. Used MySQL, PostgreSQL, MongoDB for data store and manipulated API using RESTful API and GraphQL.
- Translated designs and wireframes into a highly responsive user interface and reusable components using React.js, TypeScript, Tailwind, Angular, Vue.js.
- Developed mobile front-end application using React Native.
- Worked on the development of E-commerce website(Wigme.com) and created features to enhance the user experience for smartphones.
- Used JIRA as the bug tracking system to track and maintain the history of bugs/issues on an everyday basis.

Frontend Developer

📅 08/2015 - 10/2016

Generic Remote

- Worked as a front end developer in agile team.
- Built a custom dashboard that reduced support ticket by 50%.
- Learned React, Angular, Typescript. Involved in Front-end development using React, Redux, Typescript.

PROJECT

seeded

🔗 <https://app.seeded.network>

Skills: React , Network: Solana , Smart Contract: Rust

- Without unnecessary login, the users need to only connect their wallets.
- According to each user's wallet address, I managed all data.
- Staking page for Solana network token that called "Seeded".
- For all functions on Smart Contract, used Rust language in Anchor framework.

niftysouq

🔗 <https://www.niftysouq.com/>

Skills: React and Typescript , BE: Node.js & MongoDB

- For the login used Web3 Auth library.
- Integrated Front-end with Smart Contract using Web3.js and Ether.js.
- Support default wallet automatically when web3 auth login.
- To get NFT data and events, Used GraphQL.

mybushome

🔗 <https://www.mybushome.com>

Skills: Node.js, MongoDB, HTML5, CSS, JavaScript

- This is a website I made using Node.JS and server side templates.
- The company organizes bus transportation for students from colleges.
- This website is simple, but a good foundational work.

peggyadams

🔗 <https://www.peggyadams.org/>

Skills: PHP, MariaDB, jQuery, Bootstrap

- Peggy Adams Animal Rescue League of the Palm Beaches provides shelter to lost, homeless and unwanted animals, as well as providing medical services and care for companion animals.
- For this project, I led a team of 3 developers and collaborated with designers to build a custom Drupal 8 site for Peggy Adams.

dev.cred-iq

🔗 <https://dev.cred-iq.com/>

Skill: Node.js, Python, Lambda Function, React.js, WordPress

- This is a financial domain platform used to display details of all the non cmbs properties registered in the application.
- Core feature of this platform is valuation and to provide a score of the properties as per their market value.
